Nextfood - Educating the next generation of professionals in the agrifood system

Practice Abstract #26: The NextFood Toolbox - Tools for practitioners in action-learning activities

Author: Åsmund Lægreid Steiro an and Lutgart Lenaerts, NMBU, Norway

The Nextfood Toolbox is now available for everyone to check out on the project platform (<https://www.nextfood-project.eu/nextfood-platform/>).

It is intended to support teachers at any level of the education system who are eager to test out various aspects of the Nextfood educational approach. The toolbox diagram is the initial interface of the toolbox where users can click on each of the competences to explore relevant material related to them. For each competence there are both examples of how to train them and descriptions of what they mean. There are also instructional videos! Whether a course is week-long or spans several months, participating educators will find examples of teaching materials suited to train all the competences within the context of action learning.

The toolbox will be updated continually throughout the project with new content, so feel free to explore the current version and stay tuned for future updates!

Practice Abstract #26: La Caja de herramientas (Toolbox) de Nextfood – Herramientas para profesionales con actividades de aprendizaje activo

Autores: Åsmund Lægreid Steiro y Lutgart Lenaerts, NMBU, Noruega.

La caja de herramientas (Tool Box) de Nextfood ahora está disponible para que todos la consulten en la plataforma del proyecto (<https://www.nextfood-project.eu/nextfood-platform/>).

Su objetivo es apoyar a los profesores de cualquier nivel del sistema educativo que estén ansiosos por probar varios aspectos del enfoque educativo de Nextfood. El diagrama de la caja de herramientas es la interfaz inicial de la "Tool Box" donde los usuarios pueden hacer clic en cada una de las competencias para explorar material relevante relacionado con ellas. Para cada competencia hay ejemplos de cómo entrenarlos y descripciones de lo que significan. ¡También hay videos instructivos! Ya sea que un curso dure una semana o varios meses, los educadores participantes encontrarán ejemplos de materiales didácticos adecuados para entrenar todas las competencias en el contexto del aprendizaje activo.

La caja de herramientas se actualizará continuamente a lo largo del proyecto con nuevo contenido, así que siéntete libre de explorar la versión actual y mantente atento a futuras actualizaciones.
