## Nextfood - Educating the next generation of professionals in the agrifood system

### Practice Abstract #4: Master manual for case development, first draft

Author: Åsmund Lægreid Steiro, NMBU

A central part of the Nextfood project is the 12 case studies conducted in 10 countries on 3 continents. All these cases are attempting to transform their education models to align with the Nextfood approach. Not only are we trying to make the change, but we are also researching the process and the outcomes. In this document, the case leaders will find specific instructions on how to develop their case towards the transformational goals of the project. Primarily, this document describes the iterative process of planning, implementing and reflecting, which is to be followed by each case. Specific instructions are given to each of the three phases and appendices contain templates in relation to those specific instructions as well as examples from the past cycle of project activities. We recommend anyone interested in trying out these action learning elements to have a look at these instructions and appendices.

We believe that a successful transition to a situation where action learning is the norm for educating the future generation of professionals, we need to concretise and make guidelines as to how such an approach is done. This document constitutes one of the pillars of the foundation upon which the next generation of education system is built. This manual is written in such a way that it should be easily accessible for practitioners who would like to adapt to the Nextfood approach.

## Nextfood - Educating the next generation of professionals in the agrifood system

### Practice Abstract #4: Manual maestro para el desarrollo de casos, primer borrador

Autor: Åsmund Lægreid Steiro, NMBU, Noruega.

Una parte central del proyecto Nextfood son los 12 casos de estudio realizados en 10 países de 3 continentes. Todos estos casos intentan transformar sus modelos educativos para alinearlos con el enfoque de Nextfood. No solo estamos tratando de hacer el cambio, sino que también estamos investigando el proceso y los resultados. En este documento, los líderes de caso encontrarán instrucciones específicas sobre cómo desarrollar su caso hacia los objetivos de transformación del proyecto. En primer lugar, este documento describe el proceso iterativo de planificación, implementación y reflexión, que debe ser seguido por cada caso. Se dan instrucciones específicas para cada una de las tres fases y los apéndices contienen plantillas en relación con esas instrucciones específicas, así como ejemplos del ciclo anterior de actividades del proyecto. Recomendamos a cualquier persona interesada en probar estos elementos de aprendizaje activo que mire estas instrucciones y apéndices.

Creemos que una transición exitosa a una situación donde el aprendizaje activo es la norma para educar a la futura generación de profesionales, necesita concretar y hacer pautas sobre cómo se lleva a cabo dicho enfoque. Este documento constituye uno de los pilares de la base sobre la que se construye la próxima generación del sistema educativo. Este manual está escrito de tal manera que debe ser de fácil acceso para los profesionales que deseen adaptarse al enfoque de Nextfood.
